

PROFESSIONAL LIFTING EQUIPMENT

WHEN SAFETY DEPENDS ON PERFORMANCE!

71330

3 Ton Capacity Lightweight Floor Jack

INTENDED USE

A lightweight jack designed for a variety of automotive shop uses. Ideal for roadside service calls.

FEATURES

- U.S. Patent No. D683104 & 9,022,356
- Thick aluminum side plates.
- 48" long two-piece handle with foam handle sleeve.
- Heavy duty aluminum front and rear wheels.
- Two-speed pump piston raises the saddle to the load quickly.
- Two grab handles provide more convenient lifting of the jack.
- Steel lift saddle for greater durability and strength.
- Safety bypass and overload systems prevent cylinder damage and prevent the jack from being used beyond the ASME/PASE load-limiting standard.

Also available is our unique 3" saddle extension adapter (Model #71303). Its Patent Pending design has been created to quickly lift the load. Since most SUV's and Service Trucks have a higher low lift height, the increased height of the saddle allows for quicker positioning and quicker lifting of the vehicle. It saves time and effort and increases shop efficiency.
